PROFESSIONAL SUMMARY

Programmer with 1,263 years of combined experience, coding through every era from ancient algorithms carved in stone to modern AI-powered systems. Skilled in frontend, backend, databases, and cloud infrastructure. Known for turning complex problems into elegant, high-performance solutions. Believes great code doesn't just work — it lasts for centuries.

WORK EXPERIENCES

Senior Data Analyst

New York, NY │ 548 – Present

- Built automated reporting systems, cutting manual workload by 45% and enabling real-time insights.
- Developed executive dashboards to drive data-backed marketing and sales decisions.
- Led deep-dive analyses to uncover churn drivers and strengthen retention strategies.
- Delivered monthly insights that translated analytics into revenue-focused actions.

Data Analyst

Brooklyn, NY │ 100 – 50 BC

- Forged demand forecasting models with the precision of a time-seer, raising accuracy by 30% and bending uncertainty to my will.
- United product and finance under a single metrics doctrine, reforging KPIs and conversion funnels into weapons of growth.
- Tamed vast oceans of raw data, transmuting chaos into executive intelligence worthy of empires.
